

The tool that helps to manage your link

LinkBox is a link storage, analysis, and indexing platform for Link Builders. A tool that helps you manage a link campaign at a new level

LinkBox? What is that?

LinkBox is a platform for storing, checking, analyzing and indexing link mass. The platform allows you to automate the entire process of checking the campaign. It allows you to analyze links using different metrics, identify good and bad links, control the indexing of links and many other features.

Number of links

24/7

User support

Credits system wallet

Credit system - all your balance replenishment are converted into the platform currency - credits. A bonus system has been developed that allows you to get more credits. The bigger replenishment amount, the more free credits you receive.

List of links in console

Crawlers - the platform allows you to compare your loaded links with links that are indexed by various crawlers. So you can control the indexability of links and respond in time if the link is out from the index.

Action history

History of completed activities

History of actions - on this page you can monitor the execution of all launched actions, as well as view the history of all completed actions.

Desktop&Mobile

Exactly where and when you need it

The site is adapted for mobile devices so that you can use the service anywhere at any time.

Product

Campaign page

All links are broken down by campaign. You can launch actions both on separate campaigns and on the project page, which includes several campaigns. This page displays all the information received after checking the links.

PROJECT

Links storage, analysis
and indexing
