GOAL: The service allows to set up a corporate portal with the internal database of companies depending on the needs and preferences of each client.

IDEA: The purpose of QQ moving service is the complete automation of business processes, as well as ensuring continuous interaction between service users and transport companies - partners.

QUICK AND CONVENIENT: One of the best features of QQ service is an absolutely free moving calculator that helps to choose the most suitable moving company in just 5 minutes.

SEND REQUEST: Every type of the move has its peculiarities that you should be aware of. Professional movers have detailed knowledge of every move.

CALCULATE: The calculator provides different types of local and long-distance moves. You can find the most important things to do in order to have fast, safe, efficient and trouble-free relocation. Besides there are many moving companies that offer different services so it's very hard to decide which one to choose. That's why we created a moving calculator that will help you to make the right choice. It's a great place of planning every move, whether local or long-distance. Although choosing reputable companies might not be the first thing on your mind, you will need to ensure that your household belongings will get the care they deserve, and no one can guarantee this better than professional movers.

MOVING: The website is completely adaptive, which allows using the service regardless of the device.

ICON PACK: The website is completely adaptive, which allows using the service regardless of the device.

RESPONSIVE DESIGN GRID: The website is completely adaptive, which allows using the service regardless of the device.

HOME PAGE: The website is completely adaptive, which allows using the service regardless of the device.

TOP list of moving and packing companies in the USA: The carriers provide different types of local and long-distance moves. You can find the most important things to do in order to have fast, safe, efficient and trouble-free relocation. Besides there are many moving companies that offer different services so it's very hard to decide which one to choose. That's why we created a moving calculator that will help you to make the right choice. It's a great place of planning every move, whether local or long-distance. Although choosing reputable companies might not be the first thing on your mind, you will need to ensure that your household belongings will get the care they deserve, and no one can guarantee this better than professional movers.

How it works?

Moving company: cost:

ARE YOU A MOVING COMPANY?

Calculator: Module Calculator calculates the cost of any transportation by user-defined parameters. Within a short period of time, the module processes the received information and sends the results of calculations to the client by email.

ENTER ADDRESS: To start the calculation, the user needs to specify the address from which the moving will be performed and the address where to deliver the freight.

Step 1:

Step 2:

Billing and invoicing: Billing on the completed information, the service will perform the calculation to the specified mail in a pdf document.

Invest smart

IAN RISC

Find the best region to invest in

IAN Risc is a database which uses high-resolution geospatial data to generate a profile of a site, area or supply chain. This profile indicates where tenure risk is likely to cause problems and it has applications for risk professionals of sectors. In addition, it can be adapted to identify a broad range of leading environmental, social and governance (ESG) risks.

IAN Diligence is the business-oriented analysis of hundreds of problematic case studies in emerging and frontier markets. On the basis of this evidence, IAN Diligence provides practical, implementation-ready processes that help companies and investors to counter tenure risk at each stage of the project lifecycle.

Lovely Wash

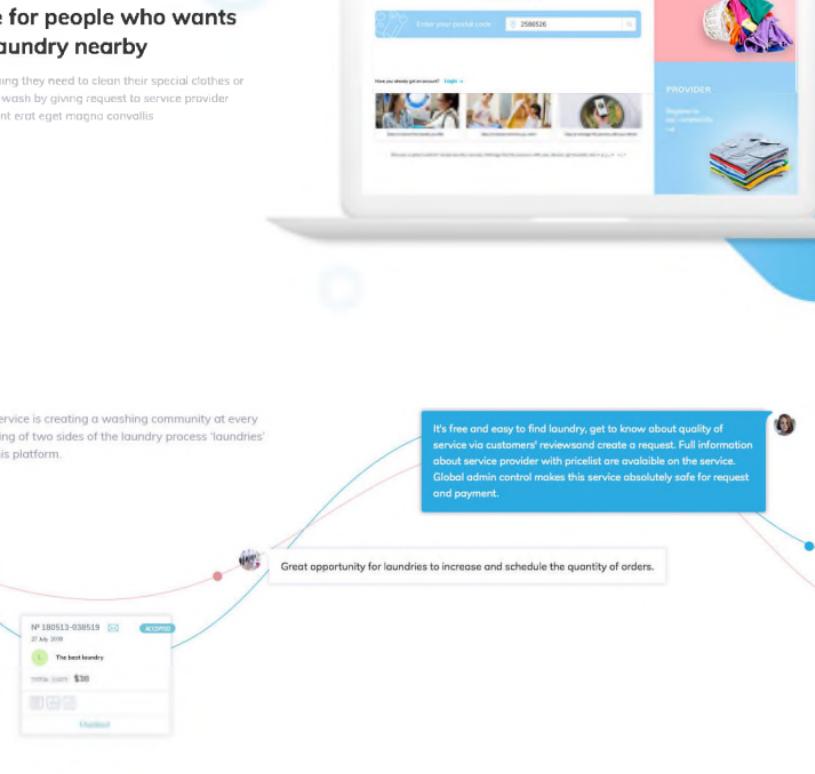

Web service for people who wants to find the laundry nearby

People can find everything they need to clean their special clothes or forget about their daily wash by giving request to service provider nearby. Praesent incident erat eget magna convallis.

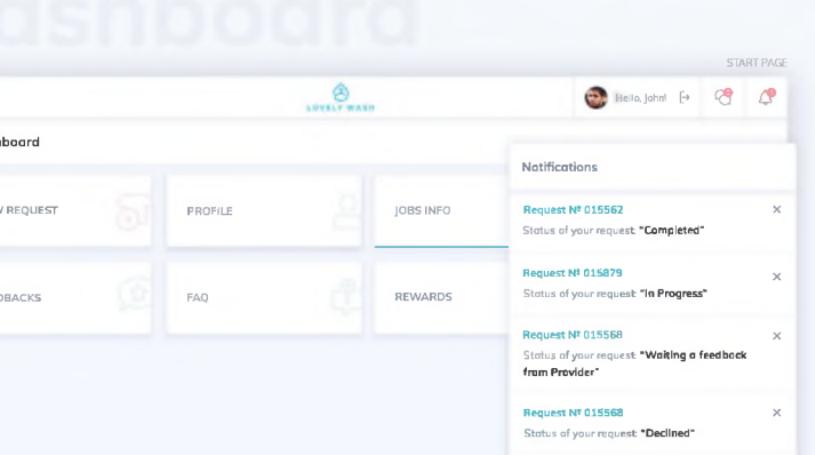

Main Idea

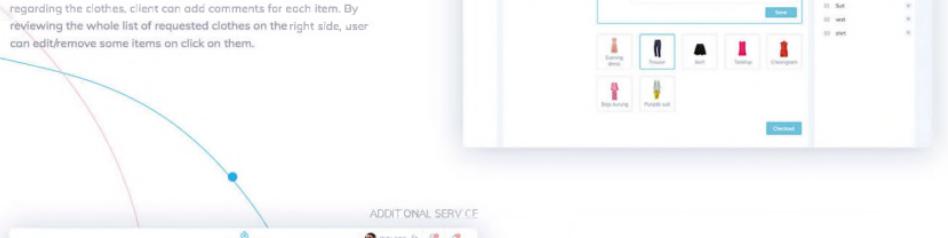

The main goal of this service is creating a washing community at every neighborhood, connecting of two sides of the laundry process 'laundries' and 'clients' by using this platform.

Color Palette

Typography

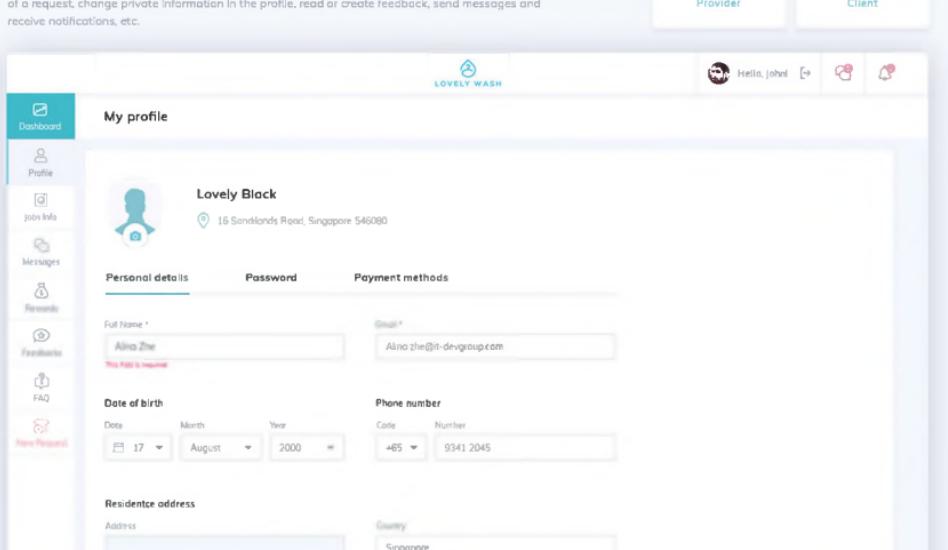

Wireframes

To create convenient in use service, our team has made marketing research of this business, created the architecture of website, design user flow and prototypes.

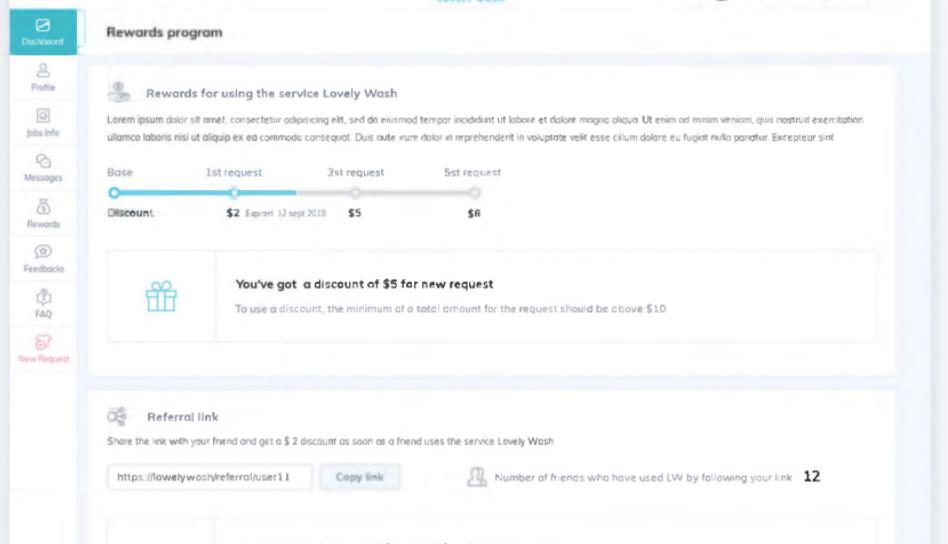

Wireframes and User stories were made in the development process to establish the basic structure of a page, demonstrate interface elements that will exist on key pages, functionality and global usability of service, to let create iterations the development process and provide the client confidence that the page is catering to user needs whilst fulfilling the key business and project objectives.

Desktop

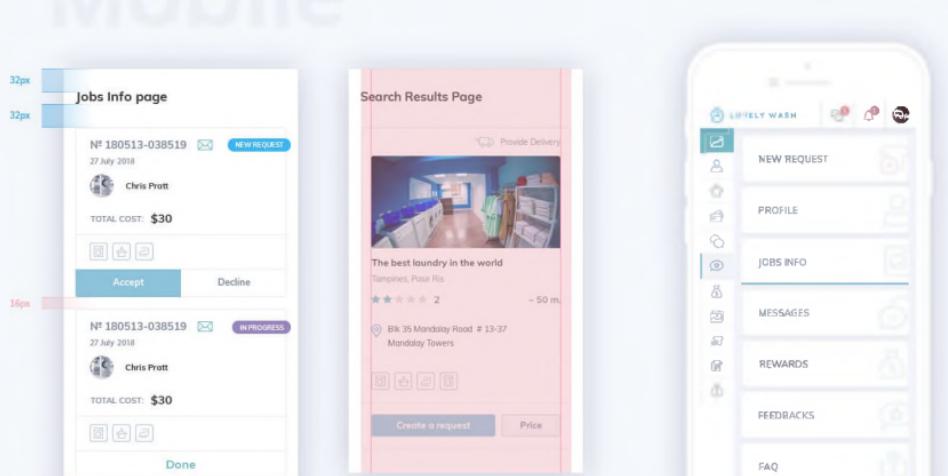

Order step 1

Choosing clothes and services is simple. To let user do not forget anything, as soon as he chooses at least one item in category this category is marked with tick. To note provider about something regarding the clothes, client can add comments for each item. By reviewing the whole list of requested clothes on the right side, user can edit/remove some items on click on them.

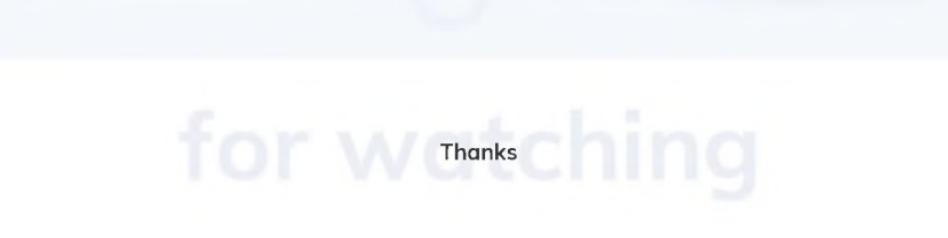

Order step 2

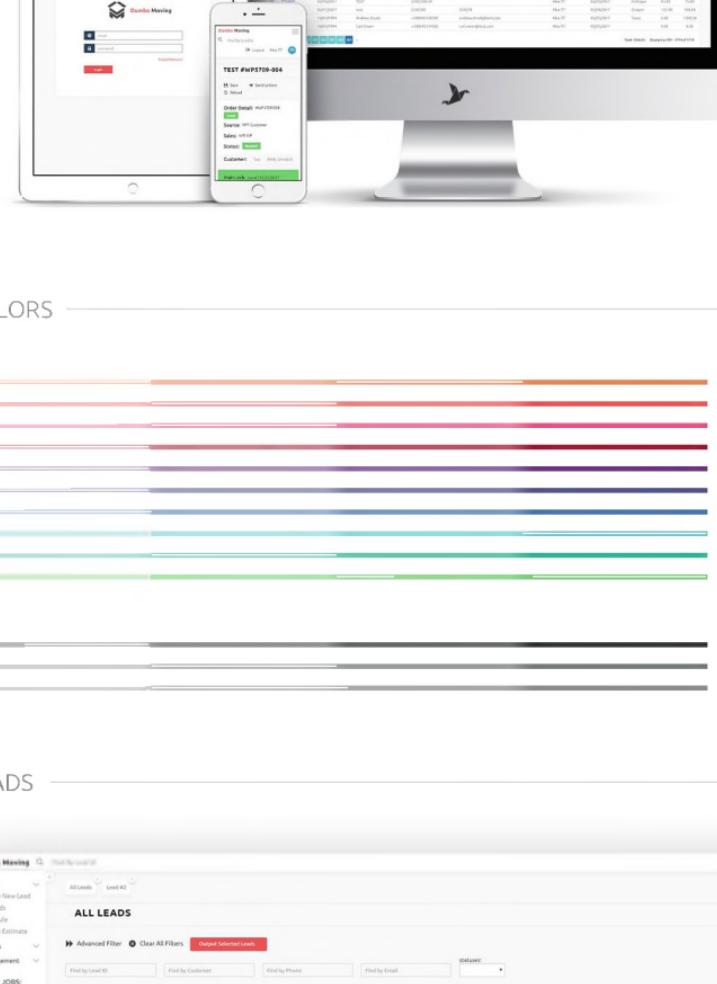

Client and Provider have a reward program. Every client can receive the discount by using the service, self-delivery or inviting friends. This discount can be used on the step of completing the order at the same time with setting delivery options.

Subject to seo-text. Very large and informative in as many as two lines

The most famous "fish" is a famous text Lorem ipsum. It is believed that the first time it was applied in the typography in the XVI century. His appearance Lorem ipsum obliged ancient Roman philosopher Cicero, after all of his treatise "On the limits of good and evil" medieval book printers snatched some phrases and words, received text "fish", is widely used to this day. Of course, there are some problems associated with the use of Lorem ipsum on sites and projects focused on the Cyrillic content - writing characters in Latin and Cyrillic varies considerably.

Subject to seo-text of the second. Not very big

And even with languages that use the Latin alphabet, there may be a small problem: in different languages or that letters appear with different frequencies, there is a difference in the length of the most common words. Hence the conclusion that it is better to use as a "fish" the text in the language you want to use when starting the project. Today, there are several options Lorem ipsum, in addition, there are special generators that create their own versions of the text based on the original treatise, whereby it is possible to get longer nonrecurring nomenclature.

PERMYSSION

Permyssion - is service when you can manage all of your sources of income and expenses and saw statistics by every source.

Also, it provides protected storage for documents which can be organized by categories.

Purpose of the project was to create easy and understandable UI for service users when all information will be available without extra clicks.

Home

01

Home page

Homepage Dashboard was created with the idea to give user full information of his account in a visual way.

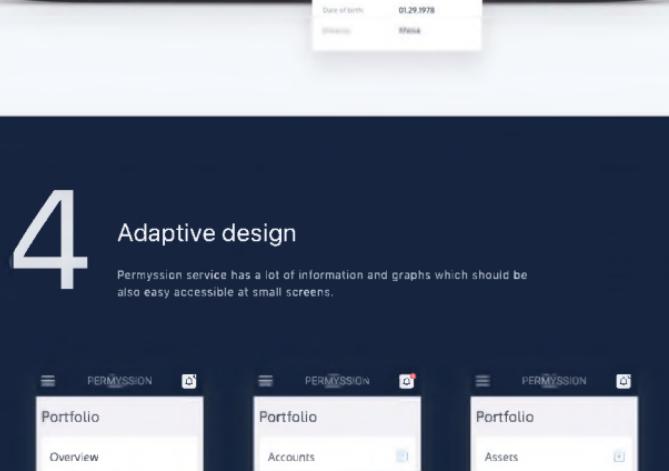

Portfolio

02

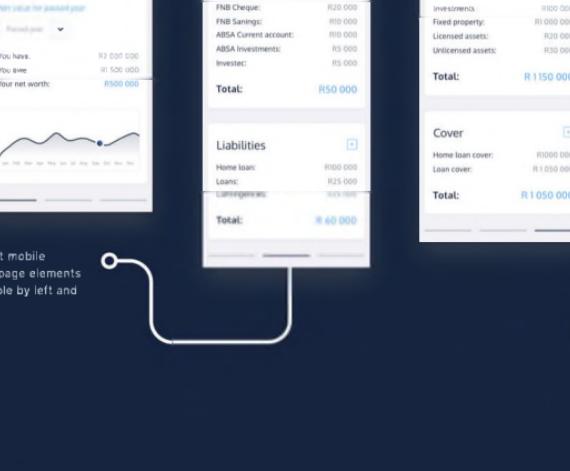

Portfolio page

At portfolio page, all user's sources are presented and graphs make it possible to quickly analyze the state of all incomes and expenses.

Me page

All user's account information are managing from Me page. So we used progress bars for information categories so it's only necessary to just look once to check what information should be added to complete account filling in.

04

Adaptive design

Permyssion service has a lot of information and graphs which should be also easy accessible at small screens.

Thanks for Watching!
